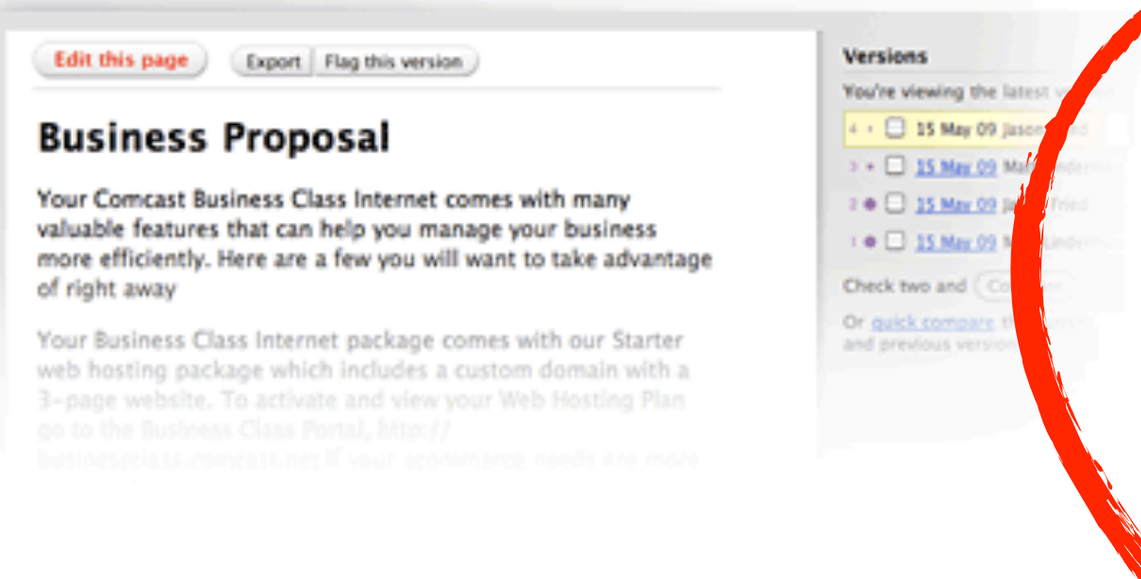
A Simple Idea

What if we allowed a group of developers to simultaneously develop the same running application?

fine-grained collaboration

vоicing tools, mobile apps, mock-up review software,
me tracking tools, and many more.



Write together with Writeboards.

Basecamp includes Writeboards. Writeboards are like web-based Word documents. But unlike Word documents, many people can collaborate on a Writeboard at once. Writeboards keeps track of who wrote what. Plus, you can roll back to any previous version or compare versions side by side.

Watch an overview of Writeboards

se Campfire for group chat.

ampfire is our group chat tool that works ith Basecamp. Share text, files, and code in al time no matter where you are. Plus, nce Campfire saves every conversation, ou can read up later on anything you issed earlier.
